

EC PRO

Capresso

Grind setting recommendations for EC PRO filters using the Capresso Infinity Conical Burr Grinder

Double Spout Filter with 2-cup sieve

Use "Fine" setting on Infinity Grinder and line indicator dot to 1st or 2nd Fine position

Bottomless Filter with bottomless sieve

Use "Extra Fine" setting on Infinity Grinder and line indicator dot to 2nd or 3rd Extra Fine position*

*When using the bottomless filter, the grind size is critically important. Experiment and adjust the grind size for each brew. Different types of coffee may require a slight adjustment to the grind size. A conical burr grinder is needed to make these fine adjustments.
